RES 12B — Comprehensive Review Questions

This question bank follows the structure of the combined **RES 1B** and **RES 2B** study guides. It is designed for active recall and exam preparation rather than as a substitute for the current legislation, MAS notices, SGX rules or firm procedures. The source guide states that each module is assessed by 60 multiple-choice questions in 1 hour 30 minutes, with a 75% pass mark; the amount of penalties is not tested.

How to use this bank

Try each question before opening the answer. Every answer is deliberately concealed in an HTML disclosure block:

The question numbers are continuous across both modules. The coverage audit at the end maps every chapter subsection and appendix to one or more questions.

Suggested revision method

1. Answer a chapter's questions without opening the disclosures.
2. Mark each answer as correct, partly correct or incorrect and return to the corresponding guide subsection.
3. Re-attempt incorrect questions after explaining the rule aloud and creating a short fact pattern.
4. Finish with mixed practice: licensing, conduct, ethics, skills and AML/CFT should be interleaved because exam questions often test the interaction between them.
